

Java Dequeue:-

Code:-

```
import java.util.*;

public class test {

    public static void main(String[] args) {

        Scanner in = new Scanner(System.in);

        Deque<Integer> deque = new ArrayDeque<>();

        HashSet<Integer> set = new HashSet<>();

        int n = in.nextInt();

        int m = in.nextInt();

        int max = 0;

        for (int i = 0; i < n; i++) {

            int num = in.nextInt();

            deque.addLast(num);

            set.add(num);

            if (deque.size() > m) {

                int removed = deque.removeFirst();

                if (!deque.contains(removed)) {

                    set.remove(removed);

                }

            }

            if (deque.size() == m) {

                max = Math.max(max, set.size());

            }

        }

        System.out.println(max);

    }

}
```

Output:-

✓ **Test case 0**

✓ Test case 1 

✓ Test case 2 

✓ Test case 3 

✓ Test case 4 

✓ Test case 5 

✓ Test case 6 

Compiler Message

Success

Java Hashset:-

Code:-

```
import java.io.*;
import java.util.*;
import java.text.*;
import java.math.*;
import java.util.regex.*;

public class Solution {

    public static void main(String[] args) {

        Scanner s = new Scanner(System.in);

        int t = s.nextInt();

        String [] pair_left = new String[t];

        String [] pair_right = new String[t];

        for (int i = 0; i < t; i++) {

            pair_left[i] = s.next();

            pair_right[i] = s.next();

        }

        HashSet<String> pairsSet = new HashSet<>();

        for (int i = 0; i < t; i++) {

            pairsSet.add (pair_left[i] +"," + pair_right[i]);

            System.out.println (pairsSet.size());

        }

    }

}
```

Output:-

✓ Sample Test case 0
